

WHAT IS PATIENT TREATMENT AUDIO?

The Williams Sound TV infrared listening system is ideal for outpatient medical treatment centers where each patient must remain in a room for several hours, seated or lying next to numerous other patients, to receive a treatment procedure – i.e., dialysis or chemotherapy.

A TYPICAL PATIENT TREATMENT AUDIO SETUP

A TV infrared listening system is installed with each TV. The transmitter mounts next to the TV, and the wireless receiver can be placed in a sterile pouch next to each patient. The patient simply plugs their earphones into the receiver jack and starts listening.*

Each TV listening system combo operates on a different frequency, so there is no interference with other TVs in the room. Each patient can watch their preferred television show without disrupting caregivers or other patients in the same room. A treatment center can successfully offer multiple TV-listening opportunities in one, large common room – often up to 10 or more TVs.

CUSTOMIZE YOUR SYSTEM

Kits can be customized to your needs. Above shows system designed for use by a leading U.S. dialysis treatment center. Call us for more information and a free personal consultation.

**A sterile environment is always maintained. Facilities often offer each patient the option of using an in-house earphone/headphone with a disposable, sterile earphone cover. Or a patient can bring his/her own earphones/headphones to each visit.*

PERSONALIZE YOUR PATIENT CARE

This Williams Sound TV infrared listening system is ideal for both health care and senior care applications, including assisted living facilities. Quality care is key: A facility can equip individual rooms in a multi-room facility or offer multiple TV-listening opportunities in one, large common room. Patient Treatment Audio allows individuals discrete, comfortable TV listening, while ensuring other patients will not be disturbed. Allows staff to provide uninterrupted patient care.

Private listening and personal volume / channel control gives the patient added comfort during treatment

Ease of use

Ease of installation — simple, add-on to TV system
